Astragal

Part # 129P or 129V

P=Pipe Insert V=Vinyl Insert

This weather strip is designed to fill the space between the meeting stiles of double doors. The space separating the aluminum retainers holding the vinyl or pile should be $\frac{3}{8}$ " as illustrated above.

1. Measure the height of the door and cut the two pieces of astragal to equal the height.
2. Fasten the astragal to each face of the individual doors with the screws furnished so as not to interfere with self-closing devices, locks or other door hardware.
3. Operate the door several times to ensure the gasketing material is adjusted properly so as to not to inhibit the door from self-closing and latching.

Positive Pressure Tested Gasketing Materials for Fire Doors. Intended for Application to/with listed steel frames and/or classified steel covered composite, hollow metal type fire doors rated up to 3 hours, wood and plastic covered composite type fire doors rated up to 1-1/2 hours, and wood core type fire doors rated up to 20 minutes.

Meets UL10B, UL10C and UBC 7-2 (1997) Category J.
